Quality assurance - you get the reassurance that a suitability qualified and experienced expert has reviewed the key aspects of your scheme, and made an assessment about its quality and suitability.

Jelf has in-depth expertise across all employee benefits, so is able to provide you with an assessment of each individual element of your overall benefits and how they work together.

Gets you Auto Enrolment compliant for your staging date - through streamlined or bespoke consultancy and support.

You receive a fully justified provider recommendation for the needs of your business and employees, based on our market knowledge and experience.

You understand the pros and cons of this valuable tax break, and how it can be implemented in your organisation.

You receive expert analysis and training about the investment options, so you can ensure the investments are suitable for the membership.

One size does not fit all, and our experienced consultants can tailor a package of support to meet your precise requirements - eg scheme wind-up, mergers and acquisitions.

ROI and engaged employees, because the value of the pension benefits you provide is being communicated to your employees in the most effective way. Also reduced opt-outs.

Supports the objective of achieving better outcomes for members, by efficiently transferring them to a more modern scheme.

Support for typically senior and highly paid employees, so they can efficiently structure their pension funds with the minimum of distraction.

Flexible administration support to complement your in-house team and provide expert help.

Peace of mind that Jelf is providing practical ongoing support to help your scheme run smoothly.
